HCP Variable Frequency Drive

MOTOR CONTROL SYSTEMS FOR
208-230/460 VAC PUMPS

1 YEAR
WARRANTY

ENHANCED PUMP CONTROL WITH SIMPLE INSTALLATION.

Compatible with Hayward HCP Series and a variety of other 208-230/460 VAC commercial pool pumps, the easy-to-install HCP Series Variable Frequency Drive (VFD) provides a budget-friendly solution for more accurate and efficient pump control in new or existing recreational water facilities. The HCP Series VFD delivers all the benefits of a variable-speed pump—including substantial energy savings, improved system efficiency, optimized performance, extended equipment life and reduced noise levels—without the hassle of needing to replace existing single-speed pumps.

SUBSTANTIAL ENERGY SAVINGS

With the ability to adjust pump motor RPMs to match any commercial pool's optimal flow rate, the VFD greatly increases the efficiency of existing pumps—resulting in major energy savings from one season to the next.

IMPROVED SYSTEM EFFICIENCY

An innovative system-matching capability provides seamless integration with Hayward HCP Series pumps—and most other competitive pumps—for greater than 98% drive efficiency.

EXTENDED EQUIPMENT LIFE

VFD reduces the amount of stress placed on pumps, extending existing equipment life and reducing the need for maintenance. Mountable with direct wiring to the pump power supply, it makes installation effortless, too.

Built-in software measures and displays run hours and kWh meters

Standard NEMA 4X enclosure protects the drive from the outdoor elements

System matching provides compatibility and seamless integration with Hayward® HCP Series pumps and most other competitive pumps*

OLED multi-language display and touchscreen provide intuitive navigation between menu options

Adjustable pump motor RPMs match the necessary flow rate for various pool sizes

Quick, easy installation doesn't require a manufacturer drive specialist

HAYWARD HCP SERIES COMPATIBLE PUMPS**

VFD includes 2-year extended warranty when purchased with a qualifying commercial pump.
