POWERFUL, AFFORDABLE WATER CHEMISTRY MANAGEMENT.

Trusted by commercial pools, spas and waterparks around the world, the CAT 2000[®] constantly monitors pH and sanitizer activity to maintain safe and healthy water quality at all times. Compatible with chlorine, bromine and salt systems.

POWERFUL CHEMISTRY CONTROL

CAT 2000 pairs CAT Professional Series pH and ORP sensors with a digital, microprocessor-based control interface to make commercial water quality management simple. Advanced control features, like proportional feed, help ensure that the water is always balanced and safe while reducing chlorine consumption.

DURABLE DESIGN

Mounted on a durable PVC backboard, CAT 2000 also features a weatherproof membrane interface for maximum protection against the elements. The sensors are long lasting and low maintenance, and all factory settings are permanently stored in memory in case a reset is ever needed.

PACKAGED FOR EASY INSTALLATION

CAT 2000 (CAT-2000 and CAT-PP2000) includes the controller, sensors, a flow cell and a flow sensor, all factory assembled on a PVC backboard for easy installation. It's also compatible with all existing chemical feed systems—even salt chlorinators.
