

2016 Hayward Pool Products Catalog

The new year brings new equipment offerings with the 2016

Hayward Pool Products catalog highlighting product offerings from the world's #1 residential pool equipment manufacturer.

From a broad selection of single speed and variable speed pumps to advanced design automatic pool cleaners, Hayward brings a wide selection of equipment offerings to make pool ownership convenient and hassle free while providing for sparkling and healthy pool water.

The 2016 Hayward Pool Products Catalog is your single reference to Hayward equipment and our Customer Service staff is ready to assist you with your request to receive the new 2016 Hayward Pool Products Catalog.

New Design SwimClear Single Element Cartridge Filter

Hayward revealed a new design SwimClear single element cartridge filter with industry leading hydraulic efficiency.

The new cartridge filter features an Easy-Lok™ ring design for quick access to the internal components. The pressure gauge and air relief valve are recessed for protection when servicing the filter.

The lower body height design allows the elements to be easily removed. Integrated handles make handling the filter easier than ever.

This new filter product became available for shipments in December. Please contact the Hayward/IMG Customer Service Department for further information.

On-Command Automation Controls

Choosing On-Command enables a full range of automation features. It allows the user to automate pool, spa and even ancillary backyard functions.

Pump, filter, heater, cleaner, pool, spa, landscape lighting, and even water features can operate automatically, while swimmers concentrate on fun.

Set the pool's circulation schedule for off-peak electrical rates through the intuitive programming function and easy to read display.

Automating tasks with an On-Command can pay for the unit, by saving up to 75% on energy costs year after year while making pool ownership carefree and more affordable.

Blue-White Offers Pool, Spa & Water Industry Products

Blue-White manufactures a full line of products designed especially with the pool, spa and water park industries in mind.

Included is the Flexflo A-100N Series

Peristaltic metering pump. For high pressure applications choose the high output Flexflo Peristaltic metering pump.

For a dependable flowmeter the F-300 Series by Blue-White has been the industry standard for more than 40 years.

The quality designed and easy-to-install DIGI-FLO F-1000 Series digital flow

meter surpasses industry standards for accuracy and needs no user programming.

Hayward Turbo Boost Jet™ for High Flow Hydrotherapy Action

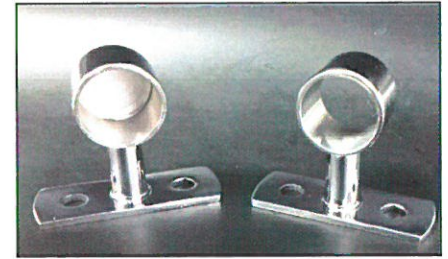

Enjoy the advantage of increased water flow action for spas and pools with the Turbo Boost Jet.

The Turbo Boost is a high-efficiency, high-powered multi-purpose fitting that actually increases water flow by up to 100 percent without any increase in pump horsepower required.

The Turbo Boost is ideal for a variety of applications where increased water flow for vigorous hydrotherapy is desired. And because its efficient design requires only nominal flow for operation, it may be used in conjunction with regular jets and single pump systems.

Stainless Items Added with New ProHayward Selections

Hayward/IMG is now making available stainless steel items through ProHayward for the convenience of Hayward sellers.

Handrail brackets and end brackets for 1.25" OD tube have been added to the ProHayward program and will be kept in stock at Hayward for easy addition to orders.

Also newly available is a stainless steel escutcheon for Hayward's popular 1434 Pak A jet body. Contact Hayward/IMG to add these items to your next order.

For more information on the products featured in Newsplash, please contact Hayward/IMG at fax: 909.444.0327, email: img@hayward.com or go to www.Haywardpool.com
