

VS Omni™ Where Convenience Meets Cool

Just introduced by Hayward is the innovative VS Omni™ that offers smart pool control on the go.

VS stands for variable speed pump and that is only the start of this exciting new product. The VS Omni™ can control up to four pieces of pool equipment: the VS pump, heater and pool lighting, plus a booster pump, backyard lighting or water feature (with an additional Smart Relay).

Smart control components are compatible with most pool equipment brands for easy setup and configuration.

VS Omni™ works with popular home automation systems like Amazon Alexa and Nest, making them a seamless addition to any smart home.

Installing a VS Omni™ pump and its auxiliary smart control components is a simple five-step process and does not require the help of a certified electrician or any extra tools.

With fast, intuitive configuration it is the most trade-friendly smart control solution on the market. The VS Omni™ is part of Hayward's EXPERT LINE of premium products not sold separately or on the internet.

Model 3700 Value Light for a Creative Solution to Tight Budgets

The 3700 value light is a good choice for fountains, steps and benches where a pool sized light is not practical.

The 50W/12V halogen light has an optimized reflector assuring good lighting performance in a smaller fixture. The lamp is also field substitutable to an MR16 type LED white lamp locally available if the project specifies an LED light source.

The 3700 is complete with niche and light removal tool. The light is ideal for tight budgets when a feature light is still specified.

Low Voltage Transformer Now Available for 120 Volt Installations

Recently added to the ProHayward Low Voltage Transformer line-up is a Hayward 120V version with multi-tap choices for proper low voltage electrical supply to underwater lights and even outdoor low-voltage lighting.

The 120V transformer is fitted with a convenient on/off power switch as well as an electrical cord for installation ease.

The transformer compliments the popular ProHayward line of 220V transformers which have become the transformer of choice of pool professionals around the world.

Contact Hayward/IMG Customer Service staff for further details on the newly introduced Hayward low voltage transformer.

Value Alternative for Quality Continuous Use Air Blowers

AIRTECH commercial blowers are ideally suited for spas, clubs or luxury villas which put a high demand on spa or pool aeration.

AIRTECH commercial blowers provide continuous operation that is impossible for a mushroom style blower. Built with rugged die cast aluminum construction and an outboard bearing, AIRTECH blowers run quieter and cooler than competing rotary blowers.

What's more, these blowers are value priced against other rotary blowers without compromising performance or reliability.

For public spa, pool and luxury pool applications, let AIRTECH blowers be your first choice in commercial blowers.

Hayward/IMG and our overseas customers have experienced emails intercepted by "hackers" that have changed the banking instructions for wire transfers under our Corporate email letterheads and staff names.

Be advised Hayward/IMG has not changed wire transfer instructions or banking details for more than 10 years.

If you receive any change from our normal wire instruction details consider this as fraudulent activity and reconfirm banking details with our Customer Service staff or Financial Department representatives.

Again, we have experienced emails being intercepted by "hackers" which are providing false banking details. Please confirm transfer details first if you note a change.

For more information on the products featured in Newsplash, please contact Hayward/IMG at fax: 909.444.0327, email: img@hayward.com or go to www.Haywardpool.com
