

HIDRONISER

Copper/Silver Ionization System

The **Hidronizer** from **Sugar Valley** continually produces algicide, bactericide and natural flocculating agents that result in improved quality control parameters for the water.

Ions are produced from copper and silver (positively charged). These attract microscopic organisms (loaded negatively) and destroy their cells. The ions flocculate suspended matter and eliminate algae and bacteria. This increases the water's transparency and reduces consumption of chemical products resulting in clear reductions in maintenance costs.

The control panel can sense and regulate pH, Redox (ORP) and free chlorine controls, filtration, lighting, temperature and up to 4 auxiliary outlets.

The Hidroniser is equipped with a detachable touch screen, connected via a cable or through optional Wi-Fi, so you may control the water's parameters without leaving your home.

The Hidronizer is ideal for residential pools. Higher capacity systems are available for commercial pools.

Complete your pool sanitization system by giving added value to your pool with the Hidronizer.

HCP 2000 Series TriStar Pumps

The **Hayward® HCP2000 Series TriStar®** pumps outperform the competition in flow and efficiency with the most energy efficient hydraulics and self-priming capability up to 10' above water level.

An elevated pump base allows for better ventilation while protecting the motor against flooding. 2"x2 1/2" union connections make installing and servicing effortless.

The HCP2000 Series pumps feature a large, no-rib strainer basket and a Tri-Lock strainer cover design for quick and easy cleaning.

The HCP2000 Series pumps are 3 phase and available in capacities from 0.5 Hp to 5 Hp for 60Hz with the 3 Hp **HCP20303** suitable for 50Hz and 60Hz.

Hayward Commercial Filters

FIBERPOOL®
Technology

Hayward Commercial Sand filters are made from bobbin-wound glass-fibre yarn impregnated with polyester resin (GFRP technology).

Available in diameters from 1050mm – 3000mm with various filtration speeds and pressure options with or without manual or automatic valve batteries.

All filters come with top manholes, pressure gauge and arm collectors. Options include side manhole, air relief valve and sight glass.

Made at Hayward's state of the art facility in Yuncos, Spain, the filters are ideal for very large pools, water parks, industrial water treatment

Valve Battery

Hayward DynaSkin™ Skimmers – Low Profile and virtually indestructible

Hayward skimmers are the preferred choice of professional pool builders. The skimmers are manufactured to Hayward's rigorous quality standards.

DynaSkin™
SP1091WM

Their durable, unibody construction is molded of rugged ABS, and they've been designed without submerged joints.

Hayward DynaSkin™ Automatic skimmers are non-corrosive skimmer packages designed for the gamut of above ground pool and some in-ground applications. A smooth, contoured body, combined with the advanced, patented weir, removes debris more completely and efficiently.

DynaSkin™
SP1091LX

The low-profile design gives you the flexibility of maximum installation height on decks and ledges.

Hayward skimmers come with multiple plumbing connections for easier installations.

Magic Lube® –

From

Many people are not aware that petroleum-based products corrode rubber and damage plastics. This can be a real problem because many of the most popular lubricants on the market are petroleum based.

Magic Lube® is a PTFE based, multipurpose sealant/lubricant that can be used in both wet and dry environments with a temperature range of -10° to 425°F. It forms a durable, adhesive film that prevents contact, even under severe shock loads.

Specially formulated to be non-melting, non-volatile, and waterproof, Magic Lube® has been USDA H-1 Rated to be environmentally safe. It is chemical resistant and compatible with most metals, rubbers and plastics.

It is commonly used on motors, O-rings, gaskets, bearings, water filters and much more.

Magic Lube® can be added to ship with your Hayward IMG orders.
