

# SwingJet

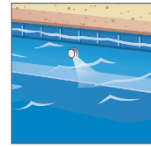

THE WALL RETURN WITH SWEEP TECHNOLOGY

Swingjets can be placed near steps to enhance debris removal.

Swingjets can be installed along walls where they can both clean the wall and help sweep debris towards the main drain.

The **SwingJet** is designed to fit into most 1 1/2" threaded wall return inlets. The **SwingJet** improves overall circulation & heating with its infinitely adjustable 3-step 90° cleaning arc and a patented automatic reversing mechanism.

When activated (1) the Swingjets pop out to deliver a high-pressure

stream of water.

When not operating the Swingjets retract (2) and then

rotate to a new position upon the next activation.

Swingjets can be aimed to focus the 90 degree cleaning arc to target hard to reach places.

SwingJets keep your pool clean and healthy by circulating warmer water and chemicals from the surface of the pool to help eliminate evaporation of chemicals and reduce heating costs.

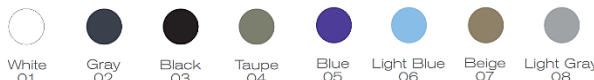

A SwingSweep package with the SwingJets is ideal as a stand-alone system to improve cleaning and circulation.

Available in 8 colors, SwingJets are made in the US by Paramount, A Hayward Company.

Scan the QR code to see the SwingJet in action.

8 Colors to Choose From

## ColorLogic® Bubbler

- Elevated Visual Appeal

The **ColorLogic® Bubbler** creates a cascading column of water. Multiple nozzles offer a wide variety of water heights and widths to match any pool environment. The plume can be adjusted to achieve the desired effect.

Blends with the environment with its small footprint, interchangeable color trim options and a two part design that incorporates a plaster ring for ability to adjust angle or height to match surface of pool.

Illuminate the ColorLogic Bubbler with **ColorLogic®** or **CrystaLogic®** 320 and 160 lighting for a wide variety of options.

# SEALED PANEL LED LIGHTS

## H-Power

### - Packaged Electrical Panels

The PROHAYWARD **UPR LED Panel** is completely encapsulated in water tight resin for leak proof operation and rated 18W/12V to provide dazzling light.

UPR Sealed LED Panel

The RGB version provides 7 fixed color choices and 8 color changing shows using the on/off switch. The WHT version can be switched to either warm white or cool daylight. The panel has a VDE compliant cord and conforms to IP-68.

To suit different applications, UPR LED Panel is packaged with the required hardware and separately with different ABS face rims which have an embossed Hayward logo.

The **3480** light is an all-in-one European design underwater LED light supplied with niche and a flexible electrical conduit for in-ground pools. This light can be used as a complete replacement for the 3478 Eurolight.

3480 Euro Style Light

The **3680** light is designed for nicheless installation over the pool finishing.

3680 Nicheless Light

The **5880** light is designed to retroactively fit into any US style niche. The light has a low profile of only 1.7cm

5880 Universal Light

The UPR LED Panel can be used as a replacement for PAR56 lamps in the **3478**, **3481** and other Euro style lights.

It can also be paired with an optional stainless steel face rim for installation in any US style niche.

UPR WITH SS Rim

Where permitted, the UPR LED panel may also be used in an underwater application without a face rim and without a niche.

## ProHayward LB030 - Hard Shell Life Ring

Ideal for pools at hotels, sports clubs and housing complexes.

LB030

**H-Power** electrical systems are available in single phase and three phase options and have integrated overload protection. All electronics (breaker, contactor, timer) are included in a single module.

The panels are available with light transformers in 50W, 100W and 300W options along with 2 timers for filtration and 1 timer for lighting.

The **H-Power Basic** system is a simple modular panel for a single filtration pump.

H-Power Basic

The **H-Power Connect** can control pumps and lights through Bluetooth with a smartphone using the HPOWER app.

H-Power Connect

The H-Power systems are available in 50Hz only and ship from France.
