Automatic Chemical Feeders Cost-effective and Simple

Hayward® automatic chemical feeders are available for residential and commercial pool applications. They are easy to introduce during new pool construction or after-market installations.

The chemical feeders operate with tri-chlore and bromine and ensure that there is sanitizer in the pool while the filtration pump is in operation.

All models have a durable ABS

CL200EF Feeder for inline applications

body along with a high-quality Viton seal and an ergonomically designed cover to allow for simple lid removal.

The Easy-Lok™

threaded cover with finger release catch to provide extra security. Sizes starting at 4.2lb capacity and up to 30lb capacity are ideal for most applications.

TriStar® XL

POWERFUL DESIGN VERSATILE PERFORMANCE

The Hayward® TriStar® XL is ideal for large residential feature-rich, commercial pools and water features.

It delivers increased flow from extra-large 3" unions. The pump has a totally enclosed fan-cooled (TEFC) motor for maximum efficiency and a chemical-resistant Viton® Seal for long-term durability.

A removable strainer housing allows for more adaptable pump configurations, and the oversized strainer basket reduces cleaning and maintenance.

Hi-Capacity Removable Strainer

The TriStar® XL has a **WEF** of upto 9.9.

Rotatable Control

Like other Hayward variable speed pumps, the TriStar® XL has a digital interface that makes pump control easy, and offers options for rotating or wall-mounting to fit your space.

Remote control the TriStar® XL with Omni® automation to manage speed, scheduling and more.

TriStar® XL is listed:

ProSeries® Tandem Filter Systems

Built Strong. Built to last.

The **Hayward® ProSeries® Tandem Filter Systems** allow pool equipment specifiers to design modular systems that allow for easy placement in the equipment room and convenient servicing of individual components without taking the total filtration system off-line.

End users benefit because Hayward Tandem Systems offer a lower installed cost compared to traditional large filter commercial systems.

Tandem installations are ideal for replacement purposes by allowing for properly sized filtration systems to be installed without having to remove walls or doorways for placement of the filtration system in the existing equipment room.

Utilizing readily available components in your tandem installations assures the immediate availability of spare parts and needed service; and repairs to the equipment can be easily performed by technical staff already familiar with the readily available equipment without the need for special tools.

ColorLogic® Bubbler Elevated Visual Appeal

The **ColorLogic® Bubbler** creates a cascading column of water. Multiple nozzles offer a wide variety of water heights and widths to match any pool environment. The plume can be adjusted to achieve the desired effect.

Blends with the environment with its small footprint, interchangeable color trim options and a two-part design that incorporates a plaster ring for ability to adjust angle or height to match surface of pool.

Illuminate the ColorLogic Bubbler with **ColorLogic®** or **CrystaLogic®** 320 and 160 lighting for a wide variety of options.

PISCINE GLOBAL

brings together international professionals from the pool and wellness sector to help build a network of high-caliber contacts among manufacturers, builders, installers and architects.

19-22 November 2024, Lyon, France
