

ColorLogic® Accent Lights

BETTER Illumination Versatility

The **Hayward® ColorLogic® LED Accent Lights** can be used for discreet, uniform pool and spa lighting or for highlighting various features such as waterfalls, spillovers, or even palm trees or walkways.

The high lumens model can be used in two brightness modes.

The 1½" lights can be installed for wet or dry use within a 10' radius of the pool. For wet use, the lights are UL listed for both in-wall and on-floor applications (without the use of a guard).

Enhanced navigation to the desired color, dimming and speed control along with additional colors and light shows are possible accessible with **OmniDirect™** App on Hayward **OmniLogic®** and **OmniHub™** automation systems.

A Hayward **SmartPower® Transformer** can easily alternate the colors for up to four zones.

The **ColorLogic® Accent Lights** are also used

with Hayward **ColorLogic® Laminar** and

ColorLogic® Bubbler illuminated water features to create the ultimate ambience.

Paramount ClearO₃ Ozonation System

The **Paramount ClearO₃** water purifying system can be added to any new or existing pool. The patented **ClearO₃** consists of an extruded aluminum main body with fiber-filled ppo resin end caps engineered to survive in the pool equipment environment. The cylindrical chamber is optimized for maximum ozone generation and sealed to minimize ozone leakage.

The **ClearO₃** water purifying system creates ozone using a proprietary UV bulb specially designed to excite ozone molecules from the oxygen in the air. Ozone is injected into the water through a Mazzei injector. A proprietary flow meter establishes the ideal flow of air for efficient ozone production.

Radiant ribs dissipate heat to maintain ozone output at peak operating temperatures and the side panel is removable, making maintenance and bulb replacement easy.

A single unit works effectively on pools up to 55,000 gallons.

Paramount SwingJet

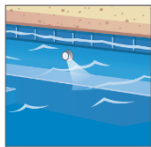

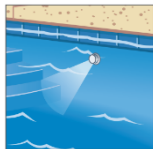

Wall Return With Sweep Technology

The **SwingJet** is designed to fit into most 1 1/2" threaded wall return inlets. The SwingJet improves overall circulation & heating with its infinitely adjustable 3-step 90° cleaning arc and a patented automatic reversing mechanism.

When activated the Swingjets pop out to deliver a high-pressure stream of water. When not operating the Swingjets retract and then rotate to a new position upon the next activation.

Swingjets can be aimed target hard-to reach places: near steps to enhance debris removal and along walls where they

can both clean the wall and help sweep debris towards the main drain.

SwingJets keep your pool clean and healthy by circulating warmer water and chemicals from the surface of the pool to help eliminate evaporation of chemicals and reduce heating costs.

Scan the QR code to see the SwingJet in action.

PROHAYWARD Pool Brushes

Brushing is a very important part of the pool maintenance process and proper brushing can go a long way in ensuring that the pool remains in good condition for a long time.

There are different type of brushes available for the pool and the type of brush to use usually depends on the surface finish.

18" Basic Plastic bristled brush

18" Plastic bristled brush with Aluminum backing

24" Heavy Duty Plastic bristled brush with Aluminum backing

Stainless Steel bristle brushes are best used on plaster finishes and for removal of stubborn algae and dirt from grouts and other rough surfaces.

5" Brush with Stainless Steel bristles

Mix bristle brushes are also useful and long lasting. Stainless Steel bristle brushes must never be used on liner pools.

Safety Vacuum Release System

The **Vac-Alert™** System reduces the risk of suction entrapment by providing a critical layer of protection against body or limb drain suction entrapment.

It reacts in less than a second to quickly release suction vacuum by allowing enough air into the piping system to ensure dissipation of the dynamic suction force caused by the circulating pump.

The Vac-Alert system is easy to install, adjust and test and is completely compliant with the Virginia Graeme Baker Pool & Spa Safety Act. For more information: **Vac-Alert.com**
