

HAYWARD® AQUARITE S3® Salt Chlorination & Pool Control System

With updated chlorine generating technology the **AquaRite® S3** can operate within a wider range of salt level from 800-8000ppm without interruption. For best performance the 3400 ppm salt level is recommended.

The new **Clear T-Cell** is compatible with all AquaRite® systems and has a lower head loss that results in reduced scaling. The cells also have an authentication system that prevents the use of counterfeit cells.

In addition to the salt chlorination, through its color touch screen display the

HLH485RELAY

AquaRiteS3 allows for basic control of pool heaters, Hayward variable speed pumps, chlorine control as well as control of single speed pumps and lights with a SmartRelay.

With a simple upgrade to the Omni platform the AquaRite S3 gives you advanced control of all pool and spa features from any computer or smartphone with the intuitive highly rated Omni® app.

Omni® App

The system can also be built upon at any time with easy-to-add accessories like pH and ORP sensing, Omni-Direct lighting etc. Multiple units can be linked together to increase chlorine output.

SwimClear™

Multi Element Cartridge Filter
- Save Water and Energy

SwimClear™ multi-element cartridge filters provide heavy-duty dirt-holding capacity and extra-long filter cycles.

SwimClear filters offer a choice of multiple capacities along with **industry's largest filter**, the C7030 model which has a whopping 700 sq.ft

SwimClear filter's top manifold configuration facilitates maximum flow through all cartridge elements for superior water clarity and increased energy savings.

Cartridges with Top manifold

The reinforced co-polymer tank is durable enough to withstand tough environmental conditions and the heavy-duty, tamper-proof, one-piece clamp provides quick access to internal components without disturbing plumbing connections.

Save up to 2,500 gallons of water per year by eliminating the need for backwashing.

An innovative water leveler that continually works to ensure that your pool or spa is at its ideal level with the level being monitored and adjusted automatically.

Paralevel's "posi-click" adjustment makes it easy to make a manual adjustment.

Paralevel offers "Smart-Sensing", which means it will ignore water sloshing in the pool as it only senses the pool's true level.

"SmartSensing" also protects Paralevel so it will not cycle on and off rapidly, like other levelers. This limits the potential for premature failure and eliminates loud water hammer that could lead to damage to plumbing.

Hayward[®] has acquired **ChlorKing**[®]

ChlorKing[®] is market leader in commercial pool saline chlorinators and UV disinfection systems. This acquisition advances Hayward's commitment to sustainable and energy-efficient technology for both commercial and residential pools.

ChlorKing[®] pioneered on-site chlorine generating technology in the 1970's., the company began generating "ultimate water" with simple, yet highly advanced technology.

NEXGEN™ on-site chlorine generator

ChlorKing[®] NEXGEN™ on-site chlorine generators are the first to produce pH-neutral chlorine, utilizing the swimming pool as the source water.

ChlorKing[®] CHLOR-SM are water-cooled saline chlorinators for commercial pools and spas. Specially modified Chlor-SM salt chlorinators sanitize sea water for onboard recreational water facilities on cruise ships, helping save money and improving safety.

CHLOR-SM Saline Chlorinator

Additionally, **ChlorKing**[®] offers the **HYPOGEN**[®] line of hypochlorous acid on-site generators suitable for various industries, including agriculture, food processing, and general disinfection of hard surfaces.

HYPOGEN[®] On-site Hypochlorous Acid Generator

ChlorKing[®] SENTRY ultraviolet light systems employ high output amalgam technology for better chloramine control and inactivation of chlorine resistant bacteria. Sentry Aqua Guard systems are designed for commercial pools and spas, and they pay for themselves through lower cost of operation and a longer lasting system.

SENTRY UV System

With more than 17,000 commercial swimming pool and water park installations worldwide, this acquisition enables Hayward to reach an even broader audience, provide the safest sanitization systems available and enhance water safety for our customers.
