

# INDUSTRY-FIRST MICROCHANNEL TECHNOLOGY FOR THE PERFECT TEMPERATURE

## BETTER FOR EVERYONE.

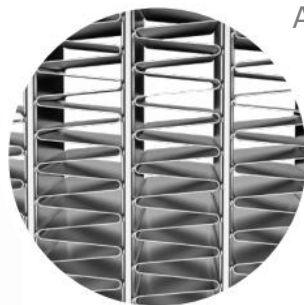

- ✓ SIGNIFICANT REDUCTION IN REFRIGERANT USED
- ✓ REDUCED ENERGY CONSUMPTION
- ✓ BUILT AND ASSEMBLED IN NASHVILLE, TN

The new 5T **HeatPro**® can be paired with Hayward's top-rated **Omni**® automation for advanced management of temperature, runtime and a whole lot more.

The new 5T **HeatPro**® heat pump is made in USA and is AHRI certified.

The new Hayward 5T **HeatPro**® **Series** of electrical heat pumps utilize industry-first **microchannel technology**.

Robust Coil Structure

A robust coil structure protects against fin damage during installation and outdoor impacts.

The new 5T **HeatPro**® is more versatile and energy efficient for improved ambient heating and, with an increased cooling capacity compared to competitive technology in heat+chill models, it cools the water to lower temperatures making it ideal for warm or desert climates and for your plunge cold pool.

85% fewer braze joints

Less complexity with an 85% reduction in braze joints means there are less leak opportunities.

A TCP coating developed by the US Naval Air Command ensures best-in-class corrosion resistance and durability in the harshest climates. The new 5T **HeatPro**® lasts longer with less performance degradation versus tube and fin construction.

## COOLS FOR PERFECT TEMPERATURE

# HYDRAPURE® AOP SYSTEM

## BETTER Sanitization with The Power of Three

The **HYDRAPURE®** is a secondary sanitization system that helps significantly reduce chlorine consumption while fortifying your pool's defenses against potentially harmful pathogens.

The **HYDRAPURE®** uses the power of three sanitizers together to destroy 99.9% of chlorine-resistant bacteria and viruses. First **Ozone**<sup>(1)</sup> injected into the water inactivates organic compounds and stops chlorine byproducts from forming. Then **UV**<sup>(2)</sup> light inactivates microorganisms.

An Advanced Oxidation Process then combines UV and Ozone together form **Hydroxyl Radicals**<sup>(3)</sup>.

The **HYDRAPURE®** operates efficiently with low head loss at flow from 10-120 GPM without requiring a bypass with 80 gpm being the most optimum flow for maximum effectiveness.

Placed after your heater and before the primary chlorination system that provides the residual chlorine, the **HYDRAPURE®** is simple to install with a rotatable top for easy access to the internal components.

An intelligent visual display makes it easy to monitor functions, bulb life and status.

The **HYDRAPURE®** is safe, eco-friendly and energy efficient. Pair it with a Hayward **Aquarite®** Salt Chlorination system for ultimate pool sanitization.

## Amerec AK Steam Generators – First Class Performance

To add steam to a shower simply requires an enclosure and the addition of a steam generator and control. Luxury is added without using any extra space.

The **Amerec AK** steam generator uses full power to quickly heat up the steam room to its preset temperature, then cuts power to half its elements. The result is a more consistent flow of soft steam and more stable temperature.

The Comfort Flo Steam Head gives an improved dispersion pattern that provides even heat throughout the steam room. The steam head's internal Ryton plastic insulator prevents the exterior metal surface from reaching high temperature.

**Amerec** is a separate, independent company. **Amerec** steam generators can be consolidated with your Hayward shipment for convenience and cost savings.
